

Product Information

POLI-FLOCK PRIME is a high-quality heat transfer rayon flock, which convinces due to the velvety feel and its brilliance. POLI-FLOCK PRIME is based on ecologically harmless raw material and is free of PVC and plasticisers. It is OEKO-TEX Standard 100 Class I certified.

POLI-FLOCK PRIME has excellent cutting and high definition weeding properties and even if it is weeded rapidly, there is no tearing of the material. POLI-FLOCK PRIME can be used for lettering on clothes such as uniforms, sport & leisure wear as well as for advertising and textile design.

POLI-FLOCK PRIME can be cut with all current plotters. We recommend using a flock knife (60°). After weeding the cut flock should be transferred by a heat press. The polyester liner should be removed warm.

POLI-FLOCK PRIME has an excellent **wash resistance of +90°C** and it is **suitable for dry-cleaning**. After washing the flock surface is not affected with adherent fibres / fluff.

POLI-FLOCK PRIME bonds well to cotton, cotton/polyester-mixtures, natural and synthetic cloths. Nylon and textiles with a hydrophobic impregnation are not suitable for heat transfer. Guarantee for secure and long-lasting bond of POLI-FLOCK PRIME is only given when following the specified temperature and pressure conditions.

We recommend evaluation on test material.

Due to the various influences which occur from production and transfer of plotter letterings, consistency of the carrier materials and also washing and cleaning conditions, product liability can only cover the unprocessed material.

Standard Dimensions

500 mm x 25 m
1.000 mm x 25 m

Technical Data

Transfer Film:	Viskose-Rayon
Adhesive:	Copolyester-hotmelt
Thickness [mm]:	0,60 +/- 5 %
Liner:	PET-film, self-adhesive

Transfer Conditions

Temperature:	160 °C
Pressure:	1,5 - 1,8 bar
Time:	15 sec.

Wash Resistance

Wash resistance:	90 °C Only colour and mild detergent. Suitable for dry-cleaning; Perchloroethylene (Tetrachloroethylene). Wash textile inside out.
