TTR-5953+	Black		-	-	X			
TTR-5953	Black		-	-				X

### Outdoor Sign Ribbons

The 50 Series SignFoil™ formulation was created to work in Gerber Edge™ and Edge FX™ printers used by the sign and graphics industry. They were formulated for and tested on 3M™ Scotchcal® vinyls. Other brands of sign vinyls may also be used with excellent results. The life of the print is directly related to the durability and quality of the vinyl.

In addition to printing on sign vinyls, favorable print results have been seen on other label stocks including:

- FLEXcon® THERMLfilm Select™ top-coated polypropylenes
- Various Gerber® substrates

Date: 05/17/13
